Growers and Collectors of

Forest and Shade Trees
Ornamental Shrubs, Plants
Roses, Etc.

McMinnville, Tennessee

Forest Nursery Company

BOYD BROS, Proprietors

McMINNVILLE, - - - TENNESSEE

INFORMATION

In presenting this catalogue, which we hope will be of some assistance to our customers in solving their planting problems, we wish to express again our sincere thanks to all those who have favored us so generously in the past years, with their valued orders.

At the beginning of our career, we determined to conduct our business on the principles prescribed in the Golden Rule, and we are happy to say to our many loyal friends and customers that this policy has proved a success. That our customers are our friends is made evident to us in many valued letters received expressing approval of the quality of stock sent, careful packing, and general satisfactorily manner of handling the business which has been entrusted to us.

In all manners have we been favored, and with a sense of sincere appreciation we enter into a new year of business, equipped better than ever for handling our steadily growing trade.

While we give our best efforts to produce and furnish a good grade of Trees and Shrubs, we do not attempt to pose as Landscape Architects, but are always glad to give such assistance as we can to our customers in making the proper selection of what to plant, etc.

LOCATION

McMinnville is located on Sparta branch of N. C. & St. L. Ry., 30 miles from Tullahoma, which is on main line, half way between Nashville and Chattanooga. Our nurseries are 2½ miles southeast of McMinnville. We are glad to have those interested visit our nurseries. Visitors are always welcome.

ORDERS—Write plainly and give explicit directions as to address and mode of shipment; otherwise we will forward according to our best judgment. All goods travel at purchaser's risk. We assume no responsibility for the goods after delivery to the forwarding companies.

We use every care to secure prompt delivery, but we are not liable for delays or damage in transit. Our responsibility in this respect ends upon delivery in good order to transportation company, but we will gladly render all the aid we can in case claim becomes necessary.

CLAIMS, to receive consideration, must be made within ten (10) days of receipt of goods.

GUARANTEE—We are very careful to keep each variety true to name as labeled, and are ready at any time to replace, on proper proof, any that may prove otherwise, free of charge, or refund the amount paid, but it is mutually agreed between the purchaser and ourselves that we shall at no time be liable for an amount larger than the original purchase price.

TERMS—Cash with order, unless otherwise arranged. Six per cent interest charged on overdue bills. Five plants at 10 rates; 50 at 100 rates.

All quotations in this list are net for the goods packed—no extra charges for packing and delivering to carriers here, unless otherwise agreed on. Customer pays carriage charges. If delayed, or lost on the road, notify

us, and we will do all possible to get it through, or collect claim, but are not responsible for carriers' neglect. We advise Express Shipments, as cost is little more than Freight on small lots, and stock gets through quicker and safer. Light packages can go PARCELS POST. We add postage to bill.

Everything is offered subject to being unsold on receipt of order and subject to shortage or failure of crops or other causes beyond control. By placing orders buyers are considered to agree with these terms.

Certificate of inspection will be sent with each shipment.

FOREST AND SHADE TREES

The following is a list of deciduous trees (those which drop their leaves in the fall) that we are offering for delivery this Fall, 1922, and Spring 1923.

Nearly all deciduous trees are hardy and will grow well in most any soil. We give but few descriptions, the names, sizes and prices which we are getting for them.

Nature has provided a tree for nearly every purpose and place, and our patrons should bear in mind that many of the ornamental trees are not so beautiful at the age and size at which they are sold and planted as they will be in after years. Trees planted and given time to develop will in most cases give satisfaction.

AMORPHA FRUTICOSA (Common False Indigo).

A tall native shrub of very easy cultivation, blooming freely in June. The violet spikes are crowded.

18 to 24 inches.....	.10	.80	3.00
----------------------	-----	-----	------

ALTHEA, or ROSE OF SHARON. These are grand flowering shrubs. There is a wide range of color, and not a day from the middle of July until September—a time when so few other shrubs are in

Shrubs—Continued

bloom—that Altheas are not aglow with flowers. They have no insect enemies, grow well anywhere, are splendidly suited for shrubby borders, for colony plantings and hedges. The planter who uses them freely makes no mistake. The following colors:

- Anemoneflora—Large double red.
- Amplissima—Double rosy red, early bloomer.
- Ardens—Double purplish, an old favorite.
- Boule de Feu—Double red.
- Bicolor—Double white, with red marks.
- Duc de Brabant—Double dark red, early bloomer.
- Joan of Arc—Pure white, very double.
- Lady Stanley—White, shaded rose, semi-double.
- Pulcherimus—Variegated flower.
- Peoniflora—White with cherry red center; very floriferous.
- Totus Alba Simplex—Large single, pure white.

2 to 3 feet, branched.....	.40	3.50	

ARONIA (Chokeberry). Attractive, perfectly hardy shrubs preferring moist location, but equally good in dry soil. Leaves are smooth, pale green, coloring vividly to red in fall. Flowers are tinted white in numerous small corymbs, succeeded by conspicuous, persistent berry-like fruits.

ARONIA NIGRA (Black Chokeberry). Dwarfier, seldom reaching 6 feet. Its flowers are slightly tinged with red, and its fruits ripen to a shiny jet black.

18 to 24 inches.....	.25	2.00	18.00
2 to 3 feet.....	.35	3.00	25.00

BARBERRY THUNBERGI (Japanese Barberry). Berberis. The Barberry Thunbergi can be planted anywhere. It has nothing to do with Black Rust. You need not be afraid to plant the Thunbergi. Invaluable little shrub that fits in with almost every planting. Grows about everywhere, handsome foliage of bright green, oval leaves that turn to most brilliant shades of orange and red in the fall. Slender, graceful branches protected by thorns, are lined with little scarlet berries of great attractiveness from early autumn well into winter. Very valuable for a low hedge.

12 to 18 inches.....	.20	1.50	12.00
18 to 24 inches.....	.25	2.00	15.00

BUDDLEIA ("Butterfly Bush," "Summer Lilac"). One of the most admired and sought after shrubs in the trade. Of quick bushy growth; when the lovely bloom-spikes appear in July, the shrub, which had probably died down nearly to the ground during winter, is now a perfect specimen of about five feet; radiating a delightful perfume and glowing with the tints and flower shape of Spring Lilacs.

THE HYDRANGEAS

Hydrangea Arborescens (Wild Hydrangea). An upright shrub, usually grows from 4 to 8 feet tall, with bright green leaves; grows naturally here in the mountains. Flowers creamy white, borne in numerous flat top clusters in early summer. Hardy and attractive.

18 to 24 inches, transplanted.....	.35	3.00	25.00
2 to 3 feet, transplanted.....	.40	3.50	30.00

Hydrangea Arborescens Grandiflora. Often called "Snowball" Hydrangea or "Hills of Snow." Blooms snowy white and borne in profusion from early June to late September. Prefers a moist, shady position.

18 to 24 inches.....	.35	3.00	25.00
2 to 3 feet.....	.40	3.50	30.00

Hydrangea, Large Flowered, (Hydrangea Paniculata Grandiflora). From mid-July until late October this shrub is a mass of white blooms, which later change to pink and purple.

12 to 18 inches.....	.25	2.00	18.00
18 to 24 inches.....	.35	3.00	25.00
2 to 3 feet.....	.40	3.50	30.00

HAMAMELIS (Witch Hazel). A hardy shrub with singular bright yellow flowers in late autumn, often after the leaves have been killed by frost. Grows usually 10 to 15 feet.

2 to 3 feet.....	.40	3.50	
3 to 4 feet.....	.50	4.00	

HYPERICUM (The St. John's Worts). Very ornamental free-flowering shrub with yellow flowers blossoming in summer.

18 to 24 inches.....	.35	3.00	25.00
2 to 3 feet.....	.45	4.00	35.00

JASMINUM (The Jasmynes). Graceful shrubs with numerous arching branches and showy flowers.

1 year.....	.30	2.50	22.50
2 years.....	.40	3.50	30.00

Shrubs—Continued

LIGUSTRUM—THE PRIVETTS

These grand shrubs are extensively used for hedges, fences and screens and also given space in the shrub plantation for the beauty of their flowers and berries. They are hardy and vigorous, thriving in almost any fertile soil and stand clipping admirably.

Privett produces wood faster than any other shrub or tree. For a hedge that is thick right down to the ground, you must set the plants close together, anywhere from 6 to 18 inches apart. It is sometimes best to set a double row, the plants "staggered" a foot apart in each line. Some people use even a triple row. The lines should be about 8 inches apart. This is the way to make the finest hedges, especially when you want them a couple of feet wide and over 3 feet high. A single row of plants will make a beautiful hedge, but it will not be so thick at the bottom, and will require careful trimming to make it as nice. When possible plow or dig a trench 2 feet wide and 1 foot deep. Don't throw the dirt out; just mix it thoroughly. A horse and harrow or cultivator are the best tools. When you have a fine bed of soil plow a trench in the middle and set the plants in dry soil.

Cut back to within 3 inches of the ground the first season; then each April cut back again to within 6 inches of the previous year's height. This harsh treatment will force a thick leafy growth of twigs and branches right from the ground up. By setting the plants 6 inches deeper than they were in the nursery, each one will have half a dozen or more stems coming out of the ground, and will thus help greatly in keeping the hedge thick at the bottom. The roots should be "puddled" as soon as you unpack them, and if you do not plant at once they should be coated with mud again just before you plant.

AMoor RIVER NORTH PRIVETT. Deciduous northern form of Amoor River Privett. This is a very hardy form, of upright growth, similar to the California Privett, but much hardier than that variety. Very desirable for hedge or planting in groups. This privett must not be confused with the evergreens or southern form of Ligustrum Amurense.

18 to 24 inches.....	.75	6.00	40.00

EVERGREENS

Hardy Evergreens are particularly valuable for use in all classes of ornamental planting in as much as they preserve their graceful foliage and coloring throughout the summer and winter.

In handling and planting evergreens, never allow the roots to become dry for an instant. When exposed to wind and sun, water has no power to restore them. When opening up the box of evergreens, puddle the roots good in thin mud and put in the ground as quickly as possible, and press the dirt good around them.

We never ship evergreens by mail.

ABIES BALSAMEA (Fir Balsam). Amer. Silver Fir.

All of the above dormant bulbs.

GLADIOLUS. The Gladioli is the most attractive of all summer flowering bulbs and deserves a place in every garden, as it is sure to do well with little care. For best results they should have a sunny position and light, sandy soil. Flowers are of almost every desirable color. By cutting the spikes when two or three of the flowers are open and placing them in water, the entire spike will open beautifully. Plant bulbs in April or May for early, and late June for fall blooming.

America. Conceded to be one of the finest varieties for cutting or bedding ever sent out; color a beautiful soft, flesh pink; orchid-like in its coloring and texture; growth and habit perfect.

Mrs. Francis King. A fine strong growing variety with large spikes of showy flowers. Color a bright shade of pure scarlet.

No. 1 two year plants.....	30c	\$2.50

Varieties—

American Beauty (C). The favorite of all roses in climbing form.

American Pillar. A fine shade of pink with clear white eye, very large flowers produced in clusters.

Crimson Rambler. As a climbing or running rose it has no equal. The foliage is rich dark green, flowers bright crimson which remain on a long time.

Excelsa. Very double, crimson flowers in large trusses.

Dorothy Perkins. A splendid climbing rose. The flowers are large, very double, sweetly scented and of a beautiful shell pink.

Baltimore Bell. Very double, bluish white flowers in large showy clusters.

Tennessee Bell. Similar, but with deeper colored fragrant blooms.

White Rambler. The flowers are the size of a silver quarter, perfectly filled, very fragrant. Color pure white, sometimes tinged with blush. Blooms in clusters.

Yellow Rambler. A new climbing rose of same class and habit of the Crimson Rambler. Flowers very light yellow.

Pink Rambler. Possesses the same features as the White Rambler. Pink flowers.

Lady Gay. The flowers are of a delicate, cherry pink color, which fades to a soft white.

FRUIT TREES

We do not grow fruit trees ourselves, but buy them from the most reliable growers in this section, and your order will have our very best attention and will try and fill with fresh dug trees true to name.
